FROM HAMLET THE NEW SATELLITE TV RECEIVER ON COMPACTFLASH®.

Hamlet introduces a new CompactFlash® GPS card that allows your PDA to have a satellite receiver (of) up to 12 channels .The new Hamlet card is the ideal solution for travelling and walking everywhere, easy to carry and Low Power consumption.

Taipei, Taiwan, 8th July 2004 – Hamlet, one of the leader brand in the Solutions Market for Connectivity and Networking, extends further its accessories' line with the “mobility” offer, such as HCFNAVI, the new CompactFlash® (CF) GPS, which allows your PDA to become a very professional and real satellite receiver up to 12 channels at the same time.

GPS card by Hamlet is very easy to use and practical to carry , it has to be inserted in the appropriate PDA CompactFlash® slot, or by using an optional PCMCIA adapter, in the notebook. The new GPS CompactFlash® by Hamlet, thanks to the GPS Technology , is able to show accurate positioning and to calculate precise Movement Speed , through very clear graphics.

The HCFNAVI compatible with all navigator software, transforms your PDA in a real satellite navigator, allowing you to choose your favourite mapping system.

The integrated antenna, NMEA Protocol Support and the real precise Positioning System, make this GPS CompactFlash® by Hamlet, together with a PDA, an efficient and helpful satellite navigator for anyone who's driving, or even during trekking trips in the mountains.

Additionally, in the packaging It's included a 1,5 MT cable, particularly useful, when in the car or in any closed environment.
