HAMLET EXHIBITION AT SMAU 2004.

Taipei, Taiwan, 21st-25th October 2004 – Hamlet, one of the leader brand in the Solutions Market for Connectivity and Networking, will be present at SMAU show (Hall .11 booth N24) with a complete products exhibition.

In the **multimedia** solutions Exaggerate by Hamlet, the new Zelig CAM is outstanding. Weighing only 70 grams ,and easy to use, it's a web cam with integrated microphone and original design, plugged in the PC USB Port and allows audio and video storage (350K pixel resolution).The big innovative item is the Master Slave with integrated lightning protector, connects up to 6 different devices and you can switch them on or off from the main master , just like the PC or the TV.

In the ADSL and Security solutions area there's MyGuard 7500, the new ADSL Router with active Anti virus and Anti spam filters, which update directly from Internet, with the contribute of Billion™ Electric Co. company quoted in the Taiwan Stock Exchange, leader in the Telecommunications Products, and Trend Micro™, a multinational company leader in the antivirus solutions, that takes care of specific parts of the software.

Next to this item, 4 Ports Router/Switch Firewall and VNP (Virtual Private Network), available also as wireless version, and the new modem/router HRDSL710W, supplied with Wlan technology 802.11g a 54 Mbps. Besides, the ADSL filters like the new lightning Protector, "in-line" Security device, to protect from thunder storms or any other shock.

When it comes to fast connection cards, the main solutions are the new PCMCIA and PCI Firewire® standard IEEE 1394b™, linking notebook and desktop to same technology devices, transferring data up to 800 Mbps.

Exaggerate by Hamlet, shows will also introduce also the new PCI and PCMCIA cards, operating up to 1500Mbps Transferring Speed, through two ways: Striping (RAID 0), that is maximum Transferring Parallel Data Speed provided on two disks, and Mirroring (RAID 1), guaranteeing with Data Redundancy, the maximum information Security.

Another stand out item of the line is the Wireless Lan CompactFlash card IEEE 802.11b.

Amongst **Bluetooth® section** there are two serial receivers RS232 Bluetooth®, able to connect, in a wireless solution, PC and other devices, such as printers, modem, with serial port RS232 by 9 poles, located up to 10 m range. Thanks to these two receivers, it's possible to avoid the use of PC, very helpful in the electronic industry.
