

Connecting XZPAD470P tablet to the computer via USB

By connecting the XZPAD470P tablet to the computer via USB port you can directly access the content stored in the internal memory of the tablet.

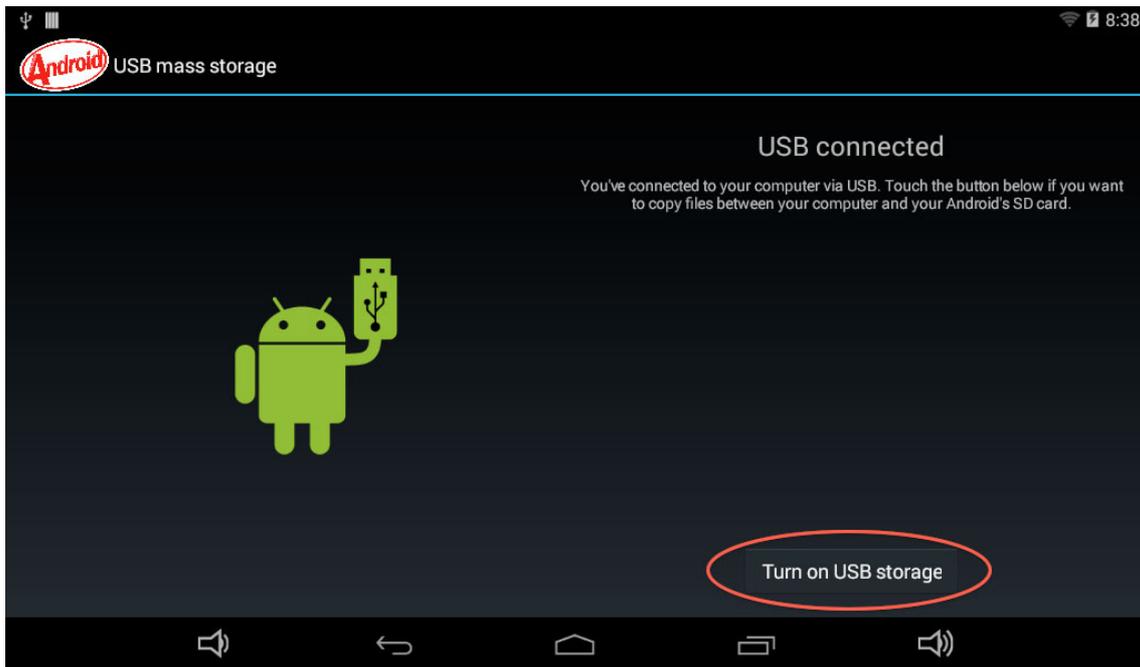

1. Turn on your tablet and connect it to the computer via USB cable.
2. In the upper left of the screen, in the notifications area, the USB icon will appear (see picture).

3. Scroll down the USB icon to expand the notifications area then press on the "USB connected" item.

4. In the next screen press the "Turn on USB storage" button to display the tablet as USB memory on the PC.

Now you can use your tablet as an usual external mass storage.
