#### Configuring the 3G connection

The following steps describe how to configure the device for browsing the Internet via a 3G connection.

Before proceeding to the following configuration please check that the charge of the battery is at least 50%.

- 1. Turn off Wi-Fi and turn off the tablet.
- Insert the SIM card in the SIM slot and turn on the tablet.
   Note: it is recommended to disable the PIN code request (if enabled) of the SIM card using a mobile phone or smartphone before insertion.
- 3. For the first connection, make sure to be in an area with good coverage of the 3G signal.

**Note**: you can check the coverage with a last generation mobile phone or smartphone (3G symbol should appear on display).

- 4. After switching on the tablet, wait about 2 minutes to allow the device to recognize and configure the SIM card.
- In the top right of the screen the 3G icon will appear to indicate the signal strength.
- 6. Enter the "Settings" screen and under "Wireless & Networks" tap on **Data usage** item.
- 7. In the "Data usage" screen touch the tab with the name of mobile operator then tap on **Cellular data** to enable the mobile data connection.
- 8. Now press the back button to return to "Settings" screen and select **More** and then **Cellular networks**.
- 9. In the "Cellular networks settings" screen you can view the list of APNs (Access Point Name) by touching the item **Access Point Names**.
- 10. Check the correct APN contacting your mobile operator then select the desired APN and wait a few seconds.
- 11. Exit the current screen and verify that the Internet access through the "Browser" app.

These settings are to be made only at the first insertion of the SIM card. On subsequent reboots of the device it will be configured automatically.

Before performing this procedure please contact the customer service of your mobile network operator to check the correct APN and the compatibility of the SIM for 3G network connection.

Sometimes it may be useful to reset the tablet to factory settings. For the recovery process, please refer to the "Backup & reset" section of this manual.

## 14 Battery Management

The battery is not fully charged from factory, so it is recommended that you charge the battery for at least 6 hours before you start to use the device. The rechargeable battery is designed and manufactured to be used and recharged frequently. As same with all of lithium batteries, the capacity of the battery reduces each time it is charged. However, you can still try to prolong the battery's lifetime by following the suggestions below:

- Use your Tablet at least once a week.
- Fully charge the battery regularly.
- Never leave the battery fully discharged for a long period of time.
- Always keep the device and the battery away from heat and moisture.

#### Battery charging

Plug the power adapter into an electrical wall outlet and then connect to the device to fully charge the battery before use.

When fully charged, the battery icon appears completely full.

A fully discharged battery will take you approximately 6 hours, but you can use the device while it is being charged.

Do not use other adapters than the one provided in your packaging, it may cause damage to the Lithium battery inside. Do not attempt to open the tablet to replace the battery inside, this will damage the tablet and void the warranty.

## 15 Important Safety Precautions

Always follow these basic safety precautions when using your Tablet. This reduces the risk of fire, electric shock, and injury.

- Do not expose this product to rain or moisture.
- Keep the device out of direct sunlight and heat sources.
- Do not place other objects on LCD screen, as it may crush and damage the LCD screen.
- Do not use any sharp objects to touch the LCD screen, as this will scratch the screen.
- Only use the AC adapter included with the device. Using any other power adapters will damage your tablet and void the warranty.
- Do not attempt to dismantle the tablet by yourself to do any repair, this will damage the tablet and void the warranty.

## 16 Clean Your Device

To clean fingerprints or dust from the screen, we recommend to use soft, nonabrasive and non-corrosive cloth for cleaning, such as a camera lens cloth.
